OBJECTIVE

Dedicated Computer Science undergraduate with hands-on experience in full-stack web development, RESTful API design, and backend systems using ASP.NET Core API and NestJS (Node.js). Seeking a Software Engineering or Web Development Internship to contribute to real-world applications, strengthen skills in database-driven systems, testing, and requirement analysis, and grow as a developer in a collaborative engineering team.

EDUCATION

Bachelor of Science in Computer Science and Engineering
American International University of Bangladesh (AIUB)-*Dhaka, Bangladesh*

- **CGPA:** 3.91 (Out of 4.00)
- **Expected Graduation:** May 2026

TECHNICAL SKILLS

Programming & Databases: C++, C#, Java, R,HTML, CSS, JavaScript,PHP ,TypeScript, Microsoft SQL Server, PostgreSQL,Oracle.

Frameworks & Technologies: ASP .NET MVC, ASP .NET Core Web API, Node.js, NestJS, Next.js, React, RESTful APIs, Entity Framework (Code First), Object Oriented Programming Full-stack Web Development,

Tools & Platforms: CodeBlocks, Visual Studio, VS Code, Postman, GitHub, Google Colab, Trello, Canva

Professional Skills: Problem Solving, Team Collaboration, Time Management, Documentation (MS Word, Excel, PowerPoint)

PROJECTS

Role-Based E-Commerce Management System | *NestJS, Next.js, SQL Server* |[Github]

- A role-based ecommerce system where Admin manages managers, Managers handle customers, product updates and Customers place orders, solving manual order handling and access-control issues through structured backend logic.
- Used NestJS (Node.js) for REST APIs, TypeORM with SQL Server for database design and relationships, Next.js (React) for frontend development, and JWT-based authentication for secure access.

Enterprise Web Application Development | *ASP.NET MVC & Core Web API* | [GitHubMVC][GitHubCoreAPI]

- Developed web applications using ASP.NET MVC and ASP.NET Core Web API following 3-Tier Architectur (Presentation, Business, Data Access layers) to ensure clean separation of concerns and scalable backend design.
- Used C#, ASP.NET MVC, ASP.NET Core Web API**,** Entity Framework (Code First)**,** SQL Server**,** RESTful API design**,** and Dependency Injection for maintainable and testable applications.
- Gained hands-on experience in enterprise-level backend development, database integration, and layered architecture—strengthening readiness for a .NET backend.

Pathology Management Platform | *ASP.NET Web Application* | [GitHub]

- A Pathology test appointment management system using ASP.NET Web Application to find different test costs of different hospitals in Dhaka at a same time and take an appointment to any of the available tests.
- VS 2022 , ASP.NET Web Application, Microsoft SQL Server 19

Memory-Efficient Fine-Tuning of LLaMA-2 using QLoRA for Question Answering | *Hugging Face* | [GitHub]

- Fine-tuned a LLaMA-2 (7B) model using QLoRA to build a question answering system with low GPU memory usage.Used 4-bit quantization and LoRA adapters to train the model efficiently without updating all parameters.

ACHIEVEMENTS & LEADERSHIP

- **Captain, University Cricket Team** – Demonstrated leadership by coordinating team activities, supporting strategy decisions, and fostering teamwork among 15+ players.
- Developed multiple full-stack and backend web applications using ASP.NET Core, NestJS, Next.js and SQL Server.
